The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

No recapture issue appears to exist, given the parent first action issue.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-18 and 26-55 are rejected under 35 U.S.C. § 112, first and second paragraphs, as the claimed invention is not described in such full, clear, concise and exact terms as to enable any person skilled in the art to make and use the same, and/or for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase “retainers *axially extending* into said interior” is incorrect where extending radially and axially may be intended.

Further, upon what claim does claim 15 depend?

Further, in claims 13 and 36, for example, how does “the contour [of the] lobe establish[] a converging wedge on the surface of [the] foil”, a separate element?

In claims 14, 16, 17 “said ... retainers” lacks an antecedent basis.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 13, as understood, is rejected under 35 U.S.C. § 102(b), as being anticipated by Saville et al. '143. The examiner finds all claimed subject matter to be present.

See Fig. 2.

Claims 1-3 and 19-25 are allowed.
